For more info or to download a registration form visit www.msfassoc.org

NFA Registration Deadline is June 15, 2026

Class 1: W0635: Best Practices in Community Risk Reduction

This 2-day course demonstrates to students nationally recognized principles that, when used appropriately, can lead to community risk-reduction programs that can measure success in local communities. This course will give students the opportunity to explore programs from communities across the United States that have been showcased at Vision 20/20 symposiums. These programs demonstrate what nationally recognized organizations identify as examples of "best practices" in community risk reduction.

At the end of the course, students will be evaluated through a 25-question, multiple-choice examination. A final grade will be provided to each student. The minimum score needed to pass is 70.

Class 2: W0458 - Preparation for Initial Company Operations

This 2-day course is designed to develop a better understanding of the role and responsibilities of Company Officers (COs) in preparing their company for incident operations and to clarify the transition from firefighter to CO and the new roles relating to leadership and safety.

This course is designed for COs, acting COs or senior firefighters responsible for the management of a single fire company at an emergency incident, including those officers who are responsible for company readiness, personnel safety and leadership as it relates to company operation.

Class 3: W0722: Health and Safety Program Manager

This 2-day course will provide fire and emergency medical services department personnel and other related emergency responders with the aptitudes and abilities necessary to manage the duties and responsibilities of the Health and Safety Program Manager (HSPM) within their respective organizations.

Successful completion of this course will enable participants to:

- Adapt the HSPM roles and responsibilities while applying risk management health and safety concepts within their organization to determine system-wide needs and to develop support to institutionalize opportunities to meet the needs assessment.
- Evaluate and prioritize health and safety-related strengths and weaknesses within their organizations.
- Evaluate the environmental barriers affecting the implementation and impact of the organization's safety and health programs.
- Evaluate and integrate the organization's and individual's responsibility to impact health and wellness positively
